KCIS School Chess Lessons 2026-2027 Term 1

I advise Chess students to play fighting chess every time. To excel in tournaments, it's best to be trained in how to force the opponent into a time pressure problem, to gain the material advantage.

Double edged fighting chess with attacks and counterattacks such as in the Sicilian Defence, Marshall Attack, are the most aggressive methods to train and to strengthen the brain speed, and performance stability.

Non symmetrical positions bring out the power of uncertainty to force instability into positions, to seize the initiative, to gain a winning material or positional advantage. The power of discomfort forces the student to think, act, and perform under pressure with sharpness of mind and wits, comfortable with the depths of complexity, and the accelerating speed in decisive decision making. Tournament temperament preparation is essential to a winning chess mind. Come and Join Ms.Ho Chess Class.
